MATHEMATICS OF THE USSR – SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 74(116) Nos. 1–4, 1967

Volume 3, Numbers 1–4 September–December, 1967 Pages 1–590

INDEX OF AUTHORS

Andrijanov, V. I. *Periodic Hamiltonian rings* 225

Bazilevič, I. E. *On a univalence criterion for regular functions and the dispersion of their coefficients* 123

Berkovič, Ja. G. *On solvable groups of finite order* 69

Berman, G. H. *Duality of functors defined on the category of nuclear (F)-spaces* 435

Burgin, M. S. *Imbedding of an amalgam of groups with a certain property into a group with the same property* 139

Èskin, G. I. *The Cauchy problem for hyperbolic systems in convolutions* 243

Èskin, G. I. See Višik, M. I. and Èskin, G. I.

Fedorova, V. P. *Linear functionals and the Daniell integral on spaces of uniformly continuous functions* 177

Fomin, G. A. *Linear methods of summation for Fourier-Lebesgue series* 23

Gapoškin, V. F. *A system of convergence* 85

Garkavi, A. L. *On compacta admitting Čebyšev systems of measures* 195

Gindikin, S. G. See Vinberg, È. B. and Gindikin, S. G.

Glagoleva, R. Ja. *Some properties of the solutions of a linear second order parabolic equation* 41

Henkin, G. M. *Impossibility of a uniform homeomorphism between spaces of smooth functions of one and of n variables* ($n \geq 2$) 551

Iskovskih, V. A. *Rational surfaces with a pencil of rational curves* 563

Ismagilov, R. S. *Linear representations of the group SL (2, R)* 453

Jakovlev, G. N. *Traces of functions in the space* W_p^l *on piecewise smooth surfaces* 481

Judovič, V. I. *An example of loss of stability and generation of a secondary flow in a closed vessel* 519

Kupcov, N. P. *Localization of equiconvergence theorems* 509

Lebed′, G. K. *Trigonometric series with coefficients satisfying certain conditions* 91

Lesohin, M. M. *On separability of subsemigroups by complex characters* 295

Ljapin, E. S. *Semigroups of directed transformations of ordered sets* 33

Myškis, A. D. and Samoĭlenko, A. M. *Systems with shocks at prescribed instants of time* 187

Nikišin, E. M. *Systems of absolute convergence* 499

Nikol′skiĭ, N. K. *Invariant subspaces of weighted shift operators* 159

Oniščik, A. L. *On Lie groups transitive on compact manifolds. II* 373

Rehlickiĭ, Z. I. *Investigation of the stability of solutions of partial differential-difference equations with leading term* 1

Samoĭlenko, A. M. See Myškis, A. D. and Samoĭlenko, A. M.

Sidorov, Ju. V. *The Cauchy problem for the Schrödinger equation with variable coefficients* 535
Šil'nikov, L. P. *On a Poincaré-Birkhoff problem* 353
Šilov, G. E. *On some questions of analysis in a Hilbert space.* III 153
Simonenko, I. B. *Operators of convolution type in cones* 279
Šmul'jan, Ju. L. *On division in the class of J-stretching operators* 471
Verner, A. L. *On the extrinsic geometry of elementary complete surfaces with nonpositive curvature.* I 205
Vilenkin, N. Ja. *Integral transforms of functions on hyperbolids.* I 109
Vinberg, È. B. and Gindikin, S. G. *Kählerian manifolds admitting a transitive solvable automorphism group* 333
Vinogradov, V. G. *Compact measures and products of Lebesgue spaces* 405
Višik, M. I. and Èskin, G. I. *Normally solvable problems for elliptic systems of equations in convolutions* 303
Zorič, V. A. *A theorem of M. A. Lavrent'ev on quasiconformal space maps* 389
